Techstart's Rapid Deployment Flyaway Kit Enables Secure Global Voice & Data Communication

Minority-owned, certified SDVOSB announces cost-effective, transportable SATCOM solution

COLORADO SPRINGS, Colorado – October 1, 2007 – [TechStart, LLC](#) introduces its flagship product, the Rapid Deployment Communications (RDC) Flyaway Kit (TSL-100RDC). The kit, based on the [ICG](#) Core Iridium System (CIS-100), offers a ready-to-go voice and data communications management system that can be used on-the-move, literally anywhere on the planet.

“The RDC Flyaway Kit provides a sorely needed operational capacity for mobile and remote operators to do more than just talk and pass data, point-to-point,” says Lou Morales, president of TechStart. “It’s the ideal full-service communications management system for mobile, tactical, disaster and personnel recovery situations, with full pole-to-pole coverage in the air, on the ground or at sea.”
