TECHSTART PROVIDES MISSION-CRITICAL TECHNICAL SOLUTIONS TO GOVERNMENT AND MILITARY MARKETS

Minority-owned, certified SDVOSB offers technical vendor diversity

COLORADO SPRINGS, Colorado – August 20, 2007 – [TechStart, LLC](#), a well-established systems engineering and telecommunications company, introduces unique products and services geared towards government and military markets. The company, a minority-owned, certified Service-Disabled, Veteran-Owned Small Business (SDVOSB), is an authorized distributor for [International Communications Group \(ICG\)](#). ICG is a recognized leader in the development of mobile communications integration, automation and management systems.

Products and Services

As a distributor for ICG, TechStart sells and supports [Iridium](#)-based satellite communication products to the aerospace and defense industry. TechStart's satcom offerings complement its space systems, wireless communications and encryption solutions. To round out its offerings, the company is an authorized reseller and/or distributor for several computer, network and telecom equipment manufacturers, including Dell and HP.

TechStart's flagship product, the Rapid Deployment Comm (RDC) Flyaway Kit (TSL-100RDC), based on the ICG Core Iridium System (CIS-100), offers a ready-to-go voice and data communications kit that can literally be used anywhere on the planet. The rugged airline overhead bin-sized system is easily transportable, economical and encryption-capable. TechStart's Flyaway Kit is ideal for tactical, mobile, disaster and personnel recovery situations, to name a few. Restoring communications during the most critical phase of an incident is rapid, simple and effective with the RDC's five-minute set up time. With three (3) command and control operator positions, first responders have global telephone access providing seamless voice, fax and data connections anywhere they may deploy.
